

## Basic Life Support

### A Lifesaving Skill for A Safer Workplace

Every year, with little to no warning, approximately 10,000 sudden cardiac arrests occur at work. Proactively training your employees with the latest resuscitation training can help save a life and create a safer work environment and community.

As the first provider of adaptive resuscitation training, our modern Basic Life Support (BLS) course not only equips individuals with the most up-to-date lifesaving knowledge and curriculum to help improve outcomes but our program also saves time and money through tailored class design.

#### Program Highlights

Content for single- and multiple-responders: cardiac arrest, respiratory arrest, airway obstruction, opioid overdose and high-quality CPR and AED use

Personalized, adaptive learning reduces seat time and increases staff availability

Flexible learning models: instructor-led, blended learning, review and challenge courses allow students to work at their own pace and skill level

This two-year certification meets OSHA, competency verification, education, credentialing and privileging requirements

Every year, thousands of businesses trust us to deliver unmatched lifesaving training and supplies to create a safer workplace. Learn how you can improve your workplace safety today.
