

American Red Cross Training: The Right Choice for Your Workplace

The Occupational Safety and Health Administration (OSHA) Bloodborne Pathogens Standard mandates training for certain employees who may potentially be exposed to human blood or bodily fluids.

The American Red Cross Bloodborne Pathogens course meets OSHA requirements and gives participants the knowledge required to help protect them from the transmission risks of bloodborne pathogens.

Learning Objectives

- Define bloodborne pathogens.
- Identify the bloodborne pathogens of primary concern.
- List the ways bloodborne pathogens can enter a person's body.
- Describe the importance of personal protective equipment (PPE) and hand washing in reducing the risk of bloodborne pathogens transmission.
- Identify work practices that help eliminate or reduce the risk of exposure.
- Learn how to remove disposable gloves properly.
- List procedures to follow if exposure occurs.

Features and Benefits

- Classroom or online only delivery options, both approximately one hour in length.
- Online/streaming videos available at no additional cost.
- Immediate access to student certificate, which is valid for one year.
- Student may download a free digital reference tool for use during and after class.
- Pairs with Red Cross First Aid/CPR/AED to meet regulatory requirements.
